

Hi, I am VIJITHA PUTLURU

SUMMARY

A motivated and enthusiastic fresher .NET Developer with knowledge of frontend technologies, C#, and SQL, seeking an opportunity in a dynamic organization to apply my skills in developing user-friendly web applications. I aim to contribute to innovative projects, strengthen my technical expertise across frontend and backend development, and grow professionally while supporting organizational goals.

JOB EXPERIENCE

Pirnav Software Solutions – Associate Software Engineer – (October 23rd, 2025, to Till Now)

- **Dotnet and SQL Developer**
 - Working on .NET application development using C# and ASP.NET
 - Writing and executing SQL queries using SQL Server Management Studio (SSMS).
 - Supporting frontend development using HTML, CSS, and React.
 - Implemented CURD operation, Procedures, Functions.

CERTIFICATES

- Attended CMR HACKFEST 1.0 and participated in “Hackathon/Project Competition” conducted by CMR College of Engineering and Technology, Hyderabad
- Certified by NPTEL in Introduction to Internet of Things.

PROJECTS

- Design and implementation of automatic surveillance robot for high altitude regions

An automated surveillance robot for high altitude regions is a robotic system designed to monitor and collect data in extreme, high-altitude environments where human presence is difficult or dangerous, utilizing advanced sensors, autonomous navigation capabilities, and robust communication systems to detect and report potential threats or environmental changes, all while operating independently with minimal human intervention.

- Smart plant monitoring system using IOT

Designed and developed a Smart Plant Monitoring System to automate and optimize plant care by monitoring key environmental parameters such as temperature, humidity, light intensity, and soil moisture. Enabled real-time data tracking and alerts via a mobile app or web interface, ensuring optimal plant health even in the owner's absence. Applicable across homes, offices, greenhouses, and agricultural settings.
